

**Advanced Home Water  
Filtration System**

## Pure Water. No Compromise. Advanced Home Water Filtration.

Life is too short for mediocrity. Elevate your lifestyle with superior standards. Water, the lifeblood of your everyday, significantly impacts your quality of life. Pamper your body with what it truly deserves - pure, high-quality water. After all, better water means better living.

Embrace the future of water purification with Viva. Our Full Home Water Refining System (FHWR) is designed with state-of-the-art technology, delivering the cleanest, purest water straight from every tap in your home. It's time to stop using your body as a filter and start enjoying the peace of mind that comes with superior water quality. With our FHWR, every sip is a testament to purity.

Our FuturePure Protection program ensures a better filter with every change, delivering superior quality, stringent safety, and sustainability.

### Sediment Filter

- Uses advanced 3-layer technology for optimal water flow
- Achieves up to 1-micron filtration accuracy
- Made of food-grade material for enhanced safety
- Comes with a lifetime free supply, saving customers money in the long run

### Heavy Metal Reduction & Taste Improvement Carbon Filter

- Features KDF 55, which effectively reduces heavy metals
- Contains natural coconut carbon for superior taste and longevity
- Ensures a lifespan of up to 18 months

### Lime-scale Reduction & Taste Improvement Carbon Filter

- Incorporates lime-scale reduction media that more efficient than traditional methods
- Achieves up to 1-micron filtration accuracy for purer water
- Lasts up to 18 months
- Contains natural coconut carbon for enhanced taste and extended lifespan

CHLORINE-FREE  
BETTER TASTE  
& SMELL

REMOVES BAD  
BACTERIA

NO HEAVY METALS  
& FLUORIDE

ANTI-AGING  
EFFECTS

BETTER  
HAIR

HYDRATED  
SKIN

LONG LASTING  
PLUMBING &  
APPLIANCES

GARDENING  
FRIENDLY

SOFTER  
CLOTHING

### Easy Installation Clip (Cover)

- No screws needed for hassle-free installation
- Simple hold-and-press clip mechanism
- Saves time with no additional tools required
- Eliminates potential risk of rusty screws

### (Optional) Back Cover

- Ideal for ground mounting
- Provides complete protection for the housing system
- Available at a nominal extra cost

### Fully Covered

- Protects all gauges from potential damage
- Dedicated space for filter change tools for easy access and management

### Stainless Steel Cover

- Durable and long-lasting
- Provides UV protection
- Anti-corrosion feature ensures longevity
- Sleek and modern design enhances aesthetics

### Brass Connector

- Heavy-duty design to handle higher water pressures
- More resilient than plastic connectors, won't crack easily
- Anti-corrosion property prevents second-time contamination

### Full-sized and Genuine 20 inch x 4.5 inch Housing

- Double the water contact surface for enhanced performance
- Extends filter lifespan, resulting in cost savings
- Made of food-grade material for safety

### Stainless Steel Glass Gauge

- Designed for longevity
- Equipped with UV protection and anti-corrosion features

### Double O-Ring

- Expertly designed to prevent leaks
- Offers a dual-layer of safety for enhanced security
- Ensures users are doubly protected against potential malfunctions and water wastage

### Stainless Steel Frame and Housing Enforce Plate

- Built tough to prevent pipe breakage during filter changes
- Offers superior durability compared to plastic-only frames

# Reverse Osmosis Water Filtration System

Components breakdown of the reverse osmosis water filtration system

Stage 4

PFAs

Fluoride

TDS

Radium

Barium

This RO filter comes standard in our packages and excels in fluoride and PFA removal. It adjusts TDS to deliver RO water via a 2-way faucet, with a 3-way option available. Ideal for baby formula, CPAP machines, and PFAs risk reduction, etc.

Stage 5

Taste

Smells

Polishing

Cooking

Beverages

The T33 post-carbon filter enhances water taste and removes residual odors. It's a standard feature in our packages, offering the final polish to your water for improved flavor and clarity after RO filtering. Ideal for cooking, beverages, and ensuring a pleasant water experience.

Stage 6

**Small Molecular Balls**  
• Improves the molecular structure of water, making it more easily absorbed by the human body

**Maifan Stone**  
• Remineralizes water. It can add various beneficial minerals and trace elements like calcium, magnesium, potassium, etc. to the water.

**Alkaline Balls**  
Adjusts the pH level of the water, making it more alkaline. Helps to neutralize acidic substances in the body

**Alkaline Balls**  
Adjusts the pH level of the water, making it more alkaline. Helps to neutralize acidic substances in the body

# Technical Data

Model	Water Filter		
Description	Full Home Water Refining System		
Dimensions	78.5cm (H) x 63.5cm (W) x 27cm (D)		
Water Pressure	0.1-0.6Mpa	IRON	Max 0.2 ppm
Water Temperature*	*5 °C – 35 °C	TDS	<1800 ppm
Total Net Water	100,000L	Operating Flow Rates	50-60 L/min

Filter Change (Water Filter)	Stage 1	Stage 2	Stage 3
Max	Every 6 months	18 Months	18 Months
Recommended	Every 6 months	12 Months	12 Months

Model	Osmosis System		
Description	Part 2: Under Sink Reverse Osmosis System		
Dimensions	34cm (H) x 23cm (W) x 23cm (D)		
Water Pressure	0.3-0.7MPa/40-100psi	IRON	Max 0.2 ppm
Water Temperature*	5-35°C/40-100a	TDS	<1800 ppm
Fast Flow Rate	0.5GPM (1.8L/M)	Turbidity	<5 NTU
Total Net Water	2,000L	PH Parameters	2-11
Tanks	3.0G	RO Specifications	75GPD

Filter Change (Osmosis System)	Stage 4	Stage 5	Stage 6
Max	Every 6 months	18 Months	18 Months
Recommended	Every 6 months	12 Months	12 Months

\*Circulated underground not surface temperature

# Bypass System

For added convenience, the Viva Water Filtration System features a pre-fabricated bypass system, allowing you to easily bypass the filters when unfiltered water is sufficient for activities such as retaining water flow during filter change, pool filling, garden watering or exterior cleaning.

Hi-Quality  
3 Piece  
Ball Valve  
& Fittings

Easy to  
Install

## Kit Includes:

- 2x Copper Pipes
- 2x Isolation Valves
- 1x Copper Tee Connector
- 1x 28mm Spanner
- 1x 30mm Spanner
